Product Description

Bring all the senses into play! This collection of 9 motor-skills development sets is designed to enhance motor, cognitive and social skills and also to stimulate the senses and awareness of colours. The set provides ample opportunity for fun play, both individually and in groups.

Floor Surfer - Stimulates the senses and enhances balance, eyesight and spatial awareness, including the ability to judge distance and speed. Also strengthens the back muscles.

Seesaw - Develops sense of balance and ability to shift weight from one foot to the

other.

Clown Hats - 2 sets. Stimulates body awareness and enhances concentration. Ideal for competitive games.

Activity Rings - 24 piece set. The building block for motor skill development! The rings can be used for dancing, balancing, juggling, throwing or stacking – the only limit is the imagination.

Giant Top - Stimulates sense of balance and enhances spatial awareness. Getting the top to rotate requires the child to use his/her whole body.

River Stones - Set of 6. This set helps develop motor skills and spatial awareness. It also helps to enhance the child's static and dynamic balance.

River - Set of 7. There are unlimited path building possibilities with this activity. The parts are easy to join and are very flexible. Even small children can take part.

Hilltops - Set of 5. Tops of different heights allow children to step or jump from top to top. It develops spatial awareness and familiarity with heights.

Tactile Discs - Set of 5 large and 5 small discs. Stimulates children's sense of touch through play. Encourages awareness of colour and structures. Helps with the development of motor and cognitive skills through sensory description.
