Product Description

XXT/Royal Blue - Very Firm - This is the toughest level, which we call XXT ("Xtra Xtra Tough"). It still has some "chewability" to it, but it's fairly rigid / pretty firm. No chew tool is indestructible, but this is usually the longest lasting level for avid chewers.

Does chewing on pen caps and pencil erasers sound familiar? Then you're in luck! Made in the USA, ARK's Krypto-Bite™ Chewable Pencil Toppers are a safe solution

for kids and adults who need to chew. Chewing can be a very effective way to help calm, self-regulate, and focus, so these chewy tools are a perfect pairing for homework, note-taking, and more. As an added bonus, they also add extra weight to the pencil for increased hand awareness and to help the pencil comfortably rest in the web space between the thumb and pointer finger. The prism shape has a hollow tube on one end to conveniently fit over standard #2 pencils.

Caution: This product is not a toy. Recommended for children 6-7 years and up (the age that children typically start using a standard pencil). Although these chew tools are sturdy and durable, no chew tool is indestructible. Wear/tear may be expected given the nature of the intended use. How long they last is typically equal to the amount and intensity of the chewing, as well as other variables (such as jaw strength, stress/anxiety levels, if other sensory strategies are in place, etc.). While for some people a chew tool will last forever, for others with heavy/aggressive oral needs, they may go through it very quickly. Please supervise at all times, regularly inspect the chew, and replace if necessary if the item shows signs of wear and tear.

DETAILS

- Each topper is sold individually
- Best practice is to use with eraser-less pencils (each topper comes with its own eraser-less pencil)
- Designed, manufactured, and assembled in the USA by ARK Therapeutic
- Each topper is medical grade, FDA compliant, and contains NO lead, phthalates, PVC, BPA, or latex
- Each topper measures approximately 2.75 inches in length and .5 inch in diameter
- Color hues may vary slightly
- Highly recommended for individuals who have Autism, sensory needs, anxiety, ADHD, etc, or for anyone of any age who needs to chew.
