Product Description

XXT / Very Firm (Royal Blue) - XXT stands for "Xtra Xtra Tough." These are the most firm and provide the most resistance to the jaw. No chew tool is indestructible, but these are very tough / the longest lasting option for avid chewing.

ARK's Textured Grabber® is an oral motor chew tool with 3 different surfaces to chew on: one smooth, one with circular bumps, and one with rectangular bumps.

As a chew tool, sensory seekers LOVE the extra sensory input from the added texture. As a feeding therapy tool, these textures simulate the feel of actual food

for realistic non-food chewing practice. They can also help desensitize the mouth, decrease oral defensiveness/aversions, and transition individuals with sensory issues from puréed to textured foods.

Just like the original [smooth Grabber](#), the Textured Grabber has an easy-to-hold loop and a long extension to reach the back molars. Use it as a safe alternative to chewing on one's hands, shirts, pencils, etc. It can also be used as an oral motor therapy tool to practice biting/chewing skills without the risk of choking, build jaw strength and stability, and exercise the mouth muscles.
