Product Description

Get the best of both worlds with ARK's Z-Grabber® - an innovative oral motor tool that combines the benefits of both the Z-Vibe® and the Grabber®. Enjoy all the versatility of the Z-Vibe® plus the added bonus of a chewable "Grabber" loop attached to the handle.

For individuals who crave vibration and sensory stimulation from the Z-Vibe®, use

the Z-Grabber® to transition them into working on biting and chewing skills with the textured tip and chewable loop. For individuals who enjoy tactile input from the Grabber®, use the Z-Grabber® for added sensory input and to transition them into using the various tips of the Z-Vibe® to work on speech and feeding skills. The loop can also be used as a handle for added convenience.

The Z-Grabber® is sold with one Textured Bite-n-Chew Tip XL. Other tips sold separately. All tips for the Z-Vibe are compatible with the Z-Grabber. Battery included (this is a special Vibe Battery not sold in stores - we recommend buying a spare). To turn the unit on, twist the Switch Tip into the handle *just* until it starts to vibrate (please do not overtighten!).

MADE in the USA out of medical grade, FDA compliant materials that contain NO lead, phthalates, PVC, BPA, or latex.

*Caution: the Z-Grabber is NOT a toy. It is a therapeutic tool intended to be used by a professional therapist (or by parents trained by their therapist). It contains small parts (including a battery) that may pose a choking hazard: direct adult supervision is required at all times.

DETAILS

- The Z-Grabber® has a lightweight, portable design. The handle (excluding the yellow tip) measures approximately 4.75" in length and just about ½ an inch in diameter. Including the tip, the unit measures an additional 2 inches in length.
- One end of the plastic handle is sealed off from the internal components so that no saliva, water, or moisture can enter from that end while working in the mouth. The Switch Tip at the opposite end of the handle turns the unit on and off and can be easily removed to replace the battery.
- The chewable "Grabber" loop can be used either for bilateral biting/chewing exercises or as a handle for easy gripping. Please note, however, that the loop is not as "chewy" as the original Grabber, as the loop has a plastic core to secure it to the handle.
- Made in the USA! The Z-Grabber™ and all of its tips are manufactured in the

United States from medical grade materials that are FDA compliant and contain no lead, phthalates, PVC, BPA, or latex.
