Product Description

ARK's popular Bite-n-Chew Tip is also offered in an XL (extra long) size! This tip attachment for the Z-Vibe® is approximately an inch longer and slightly thinner than the regular Bite-n-Chew Tip, making it easier to reach the back molar area. Use it to promote a sustained bite, practice biting and chewing skills, improve jaw strength and stability, and encourage oral motor skills. It can also be used outside the mouth on the cheeks and lips for added sensory input and stimulation.
