Product Description

ARK's Mouse Tip for the Z-Vibe® is the ultimate tool for sensory oral motor therapy, particularly for children in early intervention. His friendly "Mickey Mouse-like" face immediately sparks interest, improves concentration, and increases a child's willingness to participate in therapy. Each tip has a variety of shapes and textures for sensory input both within the oral cavity and around the lips and face. They can also be used to work on biting/chewing skills, coordination of movement, discrimination, and of course play therapy. A charming addition to any oral sensory motor treatment plan, kids will love incorporating these playful "pets" into their

speech and feeding therapy sessions.

This listing is for 1 Mouse Tip. It's available in two different versions: the soft tip (magenta) has more "give" to it, recommended for individuals with a bite reflex and/or sensory issues. The hard tip (blue) is firmer for more resistance and proprioceptive input.

- Made in the USA out of medical grade materials
 - No BPA, PVC, lead, phthalates, or latex
 - Measures approximately 3" from ear to ear
 - Dishwasher-safe
 - To be used with any Z-Vibe® or Z-Grabber® (sold separately)
 - Also available separately are cat and dog versions.
- **Caution:** this therapeutic tool should be used under adult supervision at all times.
