Product Description

Designed by Debra Beckman, these spoons are especially helpful for young children and/or individuals with poor oral motor control. The super shallow bowl and narrow size make it ideal for small mouths or for individuals who have difficulties removing food from the spoon. It is rigid enough to contain food, but soft enough to flex when needed. The handle has texture for a slip-resistant grip, and it can even be used as a tongue depressor.

- This product is made in the USA.
- Made out a lightweight, flexible material that contains no lead, phthalates, PVC,

BPA, or latex

- Each spoon measures 5" long. The bowl measures approximately 1.1 x .5" (L x W)
- Combo includes 1 regular EZ Spoon and 1 Soft EZ Spoon
- Dishwasher-safe
