Product Description

Oral motor device for jaw strenght and stabilization training, durable and tough - one of the strongest oral motor chews in the world!

Designed by therapists to simulate the ever changing textures of food, therefore assisting with children who have sensory issues when certain textures are placed in their mouth.

Due to the alternating textures of this product, it is an excellent chewable hand fidget for children craving the sensory input received from destructive oral grinding.

One side of the tube is smooth and the other is bumpy
