Product Description

Chewy Tubes help you teach chewing, biting and normalization of oral habits, essential oral motor skills needed in an OPT program. The Super Red Chewy Tube is a safe alternative to inappropriate items that are chewed by children and adult clients for sensory input. It has a closed loop that makes it easy to grasp by little hands, and a textured surface that provides additional stimulation to the oral cavity over smooth versions.

- Red, bumpy, closed-looped, non-tubular
- Firmer and shorter-stemmed than Red & Yellow Chewy Tubes
- For chewing and biting skills, TMJ stimulation, oral exploration...
- Reusable, durable and easy to clean
- Non-toxic, FDA compliant, free of latex, lead, PVC and phthalates

DETAILS

The Red Super Chew is great for children and adults.
The closed loop handle is easily grasped by little fingers.
