Product Description

Chewy Tubes help you teach chewing, biting and normalization of oral habits, essential oral motor skills needed in an OPT program. Ps and Qs are a safe alternative to inappropriate items that are chewed by clients of all ages for sensory input. The closed loops make them easy to grasp by babies, while the shorter stems reach far enough to provide sensory input but not to choke.

- Orange, smooth, closed-looped, non-tubular
- Firmer and shorter-stemmed than Red & Yellow Chewy Tubes
- For chewing and biting skills, TMJ stimulation, oral exploration...
- Reusable, durable and easy to clean
- Non-toxic, FDA compliant, free of latex, lead, PVC and phthalates
