Product Description

Jack the Code & Go® Robot Mouse is an ideal way to introduce young children to the fundamentals of coding through hands-on, screen-free play activities in the classroom or at home. Jack is easy to programme. Children code Jack by pressing the directional arrows on the back of this interactive robot mouse, and press go. Then they see Jack follow the programmed sequence. It's easy and fun to code and go with Jack!

Use Jack the Code & Go Robot Mouse to introduce the basics of STEM and coding to children ages 4+.

- This set provides teachers and parents with a fun, hands-on interactive coding robot pet mouse that is easy for young children to use. - Jack is completely screen-free. All the coding learning is done through hands-on, interactive activities. - Playing with Jack teaches children basic programming concepts including if-then thinking, step-logic, algorithms, loops, debugging, and more. - When coding Jack, children also build transferable skills including hand-eye coordination, spatial concepts, social skills, collaboration, problem-solving, and more. - The set includes Jack the Code & Go Robot Mouse, and 30 arrow coding cards that let children plan the sequence before coding Jack. Features multilingual packaging and Activity Guide. - Robotic mouse measures 10cm L. - Mouse requires 3 AAA batteries (not included). - Jack can be added to the Code & Go Robot Mouse Activity Set (sold separately).

Product Attributes

- Age: 4+
