Product Description

This wonderful giant top has plenty of uses, use it to rock from side to side, spin it, build a den which all develops children's physical coordination while they play. Made of strong plastic for both indoor and outdoor play. Very suitable for basic physical coordination training with disabled people. Take a good look at our original top. Only the original top is shaped with a pointed center. This enables children to get the feeling of turning upside-down when moving the top 360° around the center.

The edge of the top protects children's heads and hands from getting hurt whilst in play. Raised edges prevent children from getting their fingers caught under the top. And there is no risk of suffocation if children hide inside the top.

Be sure to check out the video to see the Giant Top in action!

Product Attributes

- Age: 3+
