Product Description

The Cocoon Hammock is a therapeutic hammock made entirely of high-quality, flexible material that perfectly wraps the body and responds to any movement. As a result, it creates a safe space for relaxation and tranquility while also providing active sensory stimulation. Its design provides elasticity and stretch higher than standard elastic hammocks, making it a particularly effective tool in sensory integration (SI) therapy and developmental play.

Advantages:

- The wraparound form promotes a sense of security and tranquility
- Provides

active stimulation of the vestibular and proprioceptive systems - -Promotes concentration, coordination and emotion regulation

-Ideal for SI therapy, rehabilitation classes and play at home

Maximum load: 90 kg

Dimensions (flat): 120 cm high, 71 cm wide

This product complies with EU standards and is made from only certified materials. COLORS IN STOCK MAY VARY. Note: The product does not include snap hooks, mounting hooks or a hanging kit.

For safe and comfortable use of the swing, we recommend the use of a swivel, necessary for single-hook mounting (on one hook). The swivel allows a smooth 360° rotation, protecting the ropes from excessive wear.
