Product Description

For mathematical games that facilitate understanding of basic operations. By connecting elements together, you can obtain multiples of one block. Colorful and easy-to-manipulate blocks are a great material for counting. They allow you to present numerical examples in a specific form, improve the precision of movements and help shape your spatial imagination. Children are more willing to count, group and sort according to established criteria when they are based on specific objects. For the set of blocks, we offer worksheets (SKU:100992, sold separately), which we

created based on cooperation with educators and teachers who know the kindergarten and school environment from a practical perspective. The worksheets are an additional product that is an important aid and facilitation for teachers during classes, but they can be easily used by children during individual games at home.

Product Attributes

- Age: 3+

DETAILS

Quantity: 100 pcs.

5 colors: orange, yellow, green, blue, red

Dimensions of the block: 2 x 2 cm
