Product Description

Identifies and groups the different positions of the objects around its master record, recognizing the different perspectives of each object.

PEDAGOGICAL CHARACTERISTICS

The educational content of this material is based on learning the different PERSPECTIVES from which the same object can be viewed. Through handling the photo-cards of the five basic perspectives of each object (from the front, from behind, from above, from below and from the side), the child is encouraged to create a mental image of the object in THREE DIMENSIONS and the mental rotation of the image is enhanced. The objects represented in the photos are easy for the child to identify and name, and also to determine what they are used for. They are part of the child's context and familiar to the environment in which the child lives. The dynamics of the game mean that while the child is working with twodimensional pictures in a simple and enjoyable way he/she is becoming aware of the different PERSPECTIVES from which the same object can be viewed and can interiorise the concept of INVARIABILITY OF OBJECTS, as well as developing the capacity to ORIENTATE HIM/HERSELF in different ways with regard to the objects.

The ASSOCIATION of the five cards showing the different perspectives of the same object also encourages the child's skills in term of IDENTIFYING, GROUPING and CLASSIFYING objects by noting their physical characteristics, thus developing his/her capacity for OBSERVATION at a young age.

It is also an excellent means of DEVELOPING LANGUAGE USE and extending the child's VOCABULARY

PEDAGOGICAL OBJECTIVES:

- Acquiring the ability to relate objects morphologically.

- Improving the ability to identify, discriminate and classify.
- Learning about different perspectives.
- Incorporation and development of basic vocabulary.
- Encouraging logical thought processes and spatial-temporal reasoning.
- Introduction to using abstract thought (acts as a basis for establishing mental associations and taking the first steps from concrete thought to abstract thought).
- Development of a capacity for observation, whether of the objects themselves or their characteristics and functions.
- Learning to form suppositions and explanations for possible relationships between objects.
- Improving psychomotor coordination by handling the cards and putting them together correctly.

Product Attributes

- Age: 3+

DETAILS

CONTENTS

A game comprising 70 photographs divided as follows: 14 master-cards showing photographs of objects taken from the front and 56 cards with photographs of the same objects taken from behind, above, underneath and from the side. Using the master-card, the child has to IDENTIFY and GROUP the photographs by recognising the DIFFERENT PERSPECTIVES of each object.
