Product Description

River provides unlimited possibilities for building balance paths! The elements are easy to join and very flexible, so only the imagination sets limits to the course of the river. Due to the size of the elements even small children will be able to build a "river". Made from durable plastic with anti-slip rubber edges, the river combines high quality with attractive design. The elements are stackable for easy storage. Can be combined with the "Island" and the "Bridge". Be sure to check out the video to see the River in action!
