Product Description

Matching games to learn the basics. Look at the picture on the left and choose one of three alternatives. Moves the plastic frame to frame the chosen option, and check on the back if the answer is correct.

PEDAGOGICAL OBJECTIVES

A game of association for teaching the basic notions of children's education, working with various fundamental aspects for learning about mathematics:

- Learning the numbers from 1 to 10.
- Making associations between numbers and quantities.
- Observation, reflection and logical thinking.
- Developing attention and observation skills at an early age.
- Visual-motor coordination from handling the cards.

Product Attributes

- Age: 3+
