Product Description

This educational material allows you to work with the pictures and words either separately or by linking the pictures with their corresponding words, making it possible to develop the child's INTERNAL LANGUAGE through MENTAL ASSOCIATION.

“Recognition” of the PICTURE, “association” with the SPELLING (word) and PHONETIC EXPRESSION (sound) all constitute a fundamental practice for increasing VOCABULARY in a natural way as

well as providing an excellent

READING exercise which encourages the child's LANGUAGE to evolve.

The photos of animals, foods and objects just as they are in everyday life, familiar to the child's context, involve him/her in

real-life situations. Real life is thus brought into the classroom which gives the learning sessions much greater

FUNCTIONALITY.

MULTILINGUAL LEARNING: The game's system, which provides a natural way of language learning, is an ideal method

for acquiring a second language. This makes it an extremely effective tool for learning other LANGUAGES.

This product is available in different languages.

EDUCATIONAL OBJECTIVES:

- Enriching basic vocabulary.
- Initiation to reading and writing.
- Autonomous relational learning. Acquiring the ability to relate pictures with words.
- Improving and encouraging internal language, a necessary stage before acquiring language on a social level.
- Developing observation skills, in terms of both the pictures and their characteristics and their corresponding spelling.
- Discovering the child's immediate environment through the photographic images.
- Acquiring vocabulary in other languages, making it possible to communicate with people from other cultures.
- Improving psychomotor co-ordination skills in handling the cards to pair them up using the self-correcting system.

Product Attributes

- Age: 5+

DETAILS

CONTENTS

The game comprises 216 cards: 108 cards showing photographs of animals, foods and objects that are familiar to the child as forming part of the environment in which he/she lives, plus 108 cards with their corresponding names which are paired up by using a self-correcting system of five coloured bands that allows the child to learn independently.

The cards are made from thick, compact cardboard with a plastic coating and are very resistant.
