Product Description

- Design cubes for lessons: the cubes have a window on each side where cards can be inserted. Thus, the lessons can be freely designed with this learning cube. - Story cube for the nursery: the play cube is perfect for learning to calculate. You can create learning games on the subject of calculation and reading with this motion cube. - Telling cubes to design yourself: learning cube for teacher needs in primary school. With this foam dice, children are educated to tell in the group. - Adjustable moving cube: the cubes can be adjusted again and again and can be used very versatile. The cube should not be missing in any classroom. - Great learning games in primary school: many educational games such as vocabulary training, arithmetic tasks and much more can be inserted into the windows. The learning cube is completely customisable for the respective needs. - color based on availability
