Product Description

Get a grip on fine motor skills!

These easy-to-use plastic tweezers will encourage fine motor skills while preparing young hands and brains for writing!

Tweezers action is similar to that of a clothes peg.

Use of the 'Squeezy Tweezers' strengthens a child's pincer grasp which enables them to pick up small objects between their thumb and index finger – an essential pre writing skill.

Colourful tools will develop hand-eye coordination which prepares the muscles and brain for writing. The brain coordinates movement and tactile sensations as a child is writing, which allows them to make changes as needed to maintain muscle control.

Unique tweezers have scoops on the end to allow for collection of small objects – once collected the object cannot be released until squeezed again which avoids frustration for young children still gaining control of their grasp.

Tweezers measure 12cm L.

Set includes six tweezers in six different colours.

Tweezers come in a re-sealable storage bucket.

Features multilingual packaging.
