Product Description

A pillar of OPT (Oral Placement Therapy), Bubble Therapy promotes abdominal grading, controlled oral airflow, lip rounding, and tongue retraction. It is designed to teach clients to use controlled, elongated oral airflow as a component of speech clarity. This activity, like Horn Therapy and Straw Therapy, is highly motivational and popular across both clients and speech therapists.

- Essential kit for implementing the popular Bubble Hierarchy, a pillar of Oral Placement Therapy

- Promotes abdominal grading, controlled oral airflow, lip rounding, and tongue

retraction

-Includes 1 Bubble Tube, 1 Bubble Tube Refill, 1 Bubble Bear, 1 Bubble Bear Refill, 3 Bubble Straws, 1 Puppet, and TalkTools original instruction booklet
