Product Description

TalkTools' motivational Horn Hierarchy teaches essential oral-motor skills needed in OPT (Oral Placement Therapy). Developed by Sara Rosenfeld-Johnson, this therapy addresses deficits in abdominal grading, is a prerequisite for improving velopharyngeal functioning and targets specific speech sounds. In combination with the Straw Hierarchy, it is an invaluable technique for eliminating tongue thrusting. It can also be used to reduce or even eliminate drooling.

- Horn Hierarchy is at the center of Oral Placement Therapy
- Teaches lip closure, abdominal grading, controlled oral airflow, speech clarity
- Kit includes one of each horn in TalkTools' Horn Hierarchy (colors may vary), one replacement Horn #12, and TalkTools original instruction booklet
- Not dishwasher safe

Caution: Adult Supervision Required to use this therapy horn and the Horn Kit Program. Intended for use as part of the TalkTools Horn Kit and associated hierarchy Horn Kit Program.
