Product Description

Weekly calendar to start the smallest in the temporal concept by differentiating between yesterday, today and tomorrow. Lets you put the days of the week and month. It includes simple 3-step time sequences and images to work climate.

Objective:

A simple way of learning about “YESTERDAY, TODAY and TOMORROW”.

It helps children to position the days of the week and work on the notion of time by means of three-step time sequences.

How to play:

1. Put the current month in the upper right-hand window of the panel.

2. Put the days of the week in the lowest line of windows on the panel.
3. Put the days of the month corresponding to the current week on the second line of windows from the bottom.
4. Put the YESTERDAY, TODAY and TOMORROW counters in the third line of windows above the corresponding days of the month.
5. In the upper line of windows, place above the YESTERDAY, TODAY and TOMORROW counters either illustrations of the weather or the three-step time sequences (which are numbered on the back).
6. Optionally, you can mark a public holiday in red either on the day of the week or the date of the month.
