Product Description

Material for collective use for the development of spatial orientation, with two modes of play: bingo opposite positions (blue frame), and bingo spatial orientation (red frame).

Learning of spatial concepts: above/below (or over/under), in front/behind, right/left (or one side/other side), inside/outside.

The nature of this material makes it very useful for teaching a second language at oral level.

Set the house up in a place where it can be easily seen by all the students.

Distribute the cards among the students.

The teacher, or a student, should place two animals in one of the positions that

appears in the table. The student holding a card with the photo that corresponds to the combination puts a red counter over it. The student who completes his/her card first is the winner.

Product Attributes

- Age: 3+
