## Product Description

The Therapressure brush is the only sensory brush designed by Patricia Wilbarger and recommended by her for the application of the corresponding protocol.

Its ergonomic design makes it easy to use since it adapts perfectly to the user's hand.

According to Patricia Wilbarger, "the high density of the bristles make it the ideal brush for the body".

For exact instructions on the Wilbarger Protocol, it is best to speak with a professional therapist or therapist trained in the Wilbarger Protocol.
